## Outline Drawing

## Notes

- <sup>1</sup>Production specifications shown are for beginning of life performance, end of life operating current (lop) is 120% beginning of life lop
- <sup>2</sup>Current phase within nLIGHT's NPI (New Production Introduction) process
- <sup>3</sup>Export Control Classification Number (ECCN) as defined by the Export Administration Regulations (EAR)
- <sup>4</sup>Thermal resistance is the diode junction temperature shift per incremental Watt of heat load
- <sup>5</sup>The wavelength temperature coefficient is the wavelength shift per °C change at the diode junction
- <sup>6</sup>Operating temperature defined by the package housing. Acceptable operating range is 20 - 35°C, but performance may vary
- <sup>7</sup>Does not include mass of fiber
