### Outline Drawing

### Notes

- <sup>1</sup> Production specifications shown are for beginning of life performance, end of life operating current (lop) is 120% beginning of life lop
- <sup>2</sup> Current phase within nLIGHT's NPI (New Production Introduction) process
- <sup>3</sup> Export Control Classification Number (ECCN) as defined by the Export Administration Regulations (EAR)
- <sup>4</sup> Thermal resistance is the diode junction temperature shift per incremental Watt of heat load
- <sup>5</sup> The wavelength temperature coefficient is the wavelength shift per °C change at the diode junction
- <sup>6</sup> Operating temperature defined by the package housing. Acceptable operating range is 20 - 35°C, but performance may vary
- <sup>7</sup> Does not include mass of fiber
